COVER LETTER BY

SHIRISHA

MERN STACK DEVELOPER

As a passionate and dedicated developer with hands-on experience in developing full-stack web applications using MongoDB, Express.js, React.js, and Node.js, I am eager to contribute to your team. I have worked on user authentication systems, CRUD operations, and responsive front-end designs. My experience includes integrating RESTful APIs, managing databases with MongoDB, and ensuring smooth server-client communication with Express and Node.js. I am also familiar with version control systems like Git, which I use to maintain clean and collaborative code. Beyond my technical skills, I am a quick learner, a team player, and committed to continuous improvement. I thrive in environments that challenge me and offer opportunities to apply my knowledge to solve real-world problems.
